NEW SERVICE for ADDED VALUE - In-House Coating

Micro 100 is pleased to announce that we have expanded our tool coating capabilities. Our acclaimed carbide substrate combined with the right coating can provide longer life and better part finishes.

- * **Micro 100** has high quality, coated tooling already in stock on many standard items.
- * Efficient coating procedures for taking our uncoated product and coat to your request.
- * State-of-the-Art Coating technologies.
- * Knowledgeable coating technicians.
- * These **NEW** efficiencies will see **Micro 100** adjusting many standard coated tool prices **downward** to pass along our coating cost savings on to our consumers.
- * Timely turnarounds.
- * Coatings that we offer as standard for your choice(s):
TiN, ALTiN, TiCN, TiALN and nACRo ("Nanotech CR")
- * Coatings that are best matched for cutting specific materials will greatly enhance tool life. Customer Service can make suggestions to assist you.
- * **Micro 100** is also ready to quote you a coating on your own specially ground tools and tooling for your special dimensional callout needs.

If you have further questions about our **NEW COATING CAPABILITIES**, please contact your local Micro 100 Representative or

the Micro 100 Customer Service Team and they will be happy to assist you.
