**MICRO 100 SUPER CARBIDE TOOLS**

#### **CAREER OPPORTUNITY**

**Job Title:** Industrial Journeyman Machinist  
**FLSA Status:** Non- Exempt  
**Shift:** Weekdays 8 AM to 5 PM  
**Reports To:** Industrial Engineer  
**Location:** 1410 E. Pine Ave., Meridian, ID 83642

#### **About Micro 100 Tool**

Micro 100 is an OEM manufacturer of carbide cutting tools. Employees at Micro 100 are given opportunities to innovate best practices and advance in their careers by attending seminars and higher learning programs. Micro 100 offers an extensive benefits package including medical, dental, vision, EAP, life, short and long-term disability, 401(k), vacation, personal leave, merit pay, and monetary awards. Micro 100's company culture is to value and respect employees resulting in long-term employee retention.

In search of a highly skilled CNC machinist/programmer for a job shop and production environment.

#### **Job Duties include, but not limited to:**

- Program and set up CNC Mori Seiki and Mazak mill/turn centers, CNC and manual mills, and manual lathe.
- Experience in CAM software will be needed with knowledge of Esprit being a plus.
- CAD experience preferred with knowledge of Solidworks being a plus.
- Create programs and setups for new processes.
- Train machine operators for production runs.
- Create models and prints of parts and fixtures to be machined.
- Fabricate jigs and fixtures for internal use in production machines.
- Work from blueprints, sketches, work orders, models of parts to be made, or other specifications; determine which machine tool would be best for each operation to be performed.
- Operating drill presses, grinders, power saws, and bending machines.
- Perform PM maintenance on some machines as well as help maintenance department as needed.
- Job requires creativity and a great understanding of how to tackle different jobs, each different from the last.

We are not looking to train on the use of CNC equipment. Must be able to enter the position with full knowledge and experience of all aspects of CNC mill/turn centers, including programming and the ability to train production personnel. Applicant must understand geometric tolerancing and must have the highest work ethic, be self-motivated, dependable and have effective communication skills! Qualified personnel need only apply.

#### **Minimum Requirements:**

- High School Diploma
- 3 years previous experience in CNC machining
- Experience in CAD and CAM programming
- PC proficiency
- Own and know how to use Calipers, micrometers, dial indicators, and hand tools.
- Some welding experience would be beneficial.
- A proven commitment to safety, attention to detail and recognition for diligence (urgency).
- Meet the requirements of a drug free workplace

#### **Physical Requirements and Environmental Demands:**

- Moderate physical activity, requiring handling of average-weight objects up to 50 lbs.
- Standing or walking for 8 or more hours a day.
- Work environment involves some exposure to hazards or physical risks.
